

The 'assurance'  
that powers your business to new heights

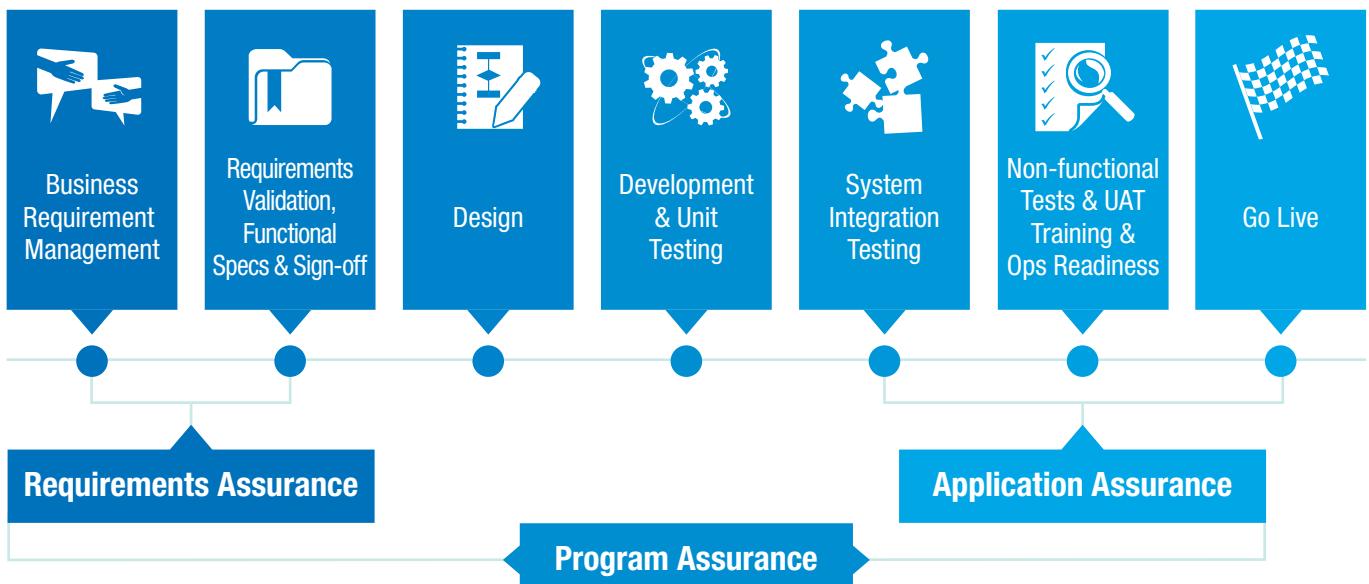

# IT Lifecycle Assurance

Partnering with clients from requirements to release

Industry reports indicate that over one-third of the IT budget of a company can be wasted on poor definition and improper management of IT requirements. Until recently, Quality Assurance was predominantly seen as 'defect detection' with IT testing companies fulfilling this role. Today, clients have begun to understand the scope for 'defect prevention' and therefore Assurance has moved up and across the entire IT adoption lifecycle.

<b>8 out of 10</b>	8 out of 10 technology absorption programs don't meet QCT (Quality, Cost, Time) goals "first-time-right"
<b>33% rework</b>	At least 33% rework effort caused by poor requirements definition in over 6 out of 10 programs
<b>Investments</b>	Time and investments on Quality are back-loaded in the program lifecycle, often not thought through
<b>Fragmented</b>	There is no single entity assuring quality from requirements to release - accountability is fragmented

A consistent focus on Assurance across IT Adoption Lifecycle from requirements to release, with increased focus on defect prevention rather than detection.

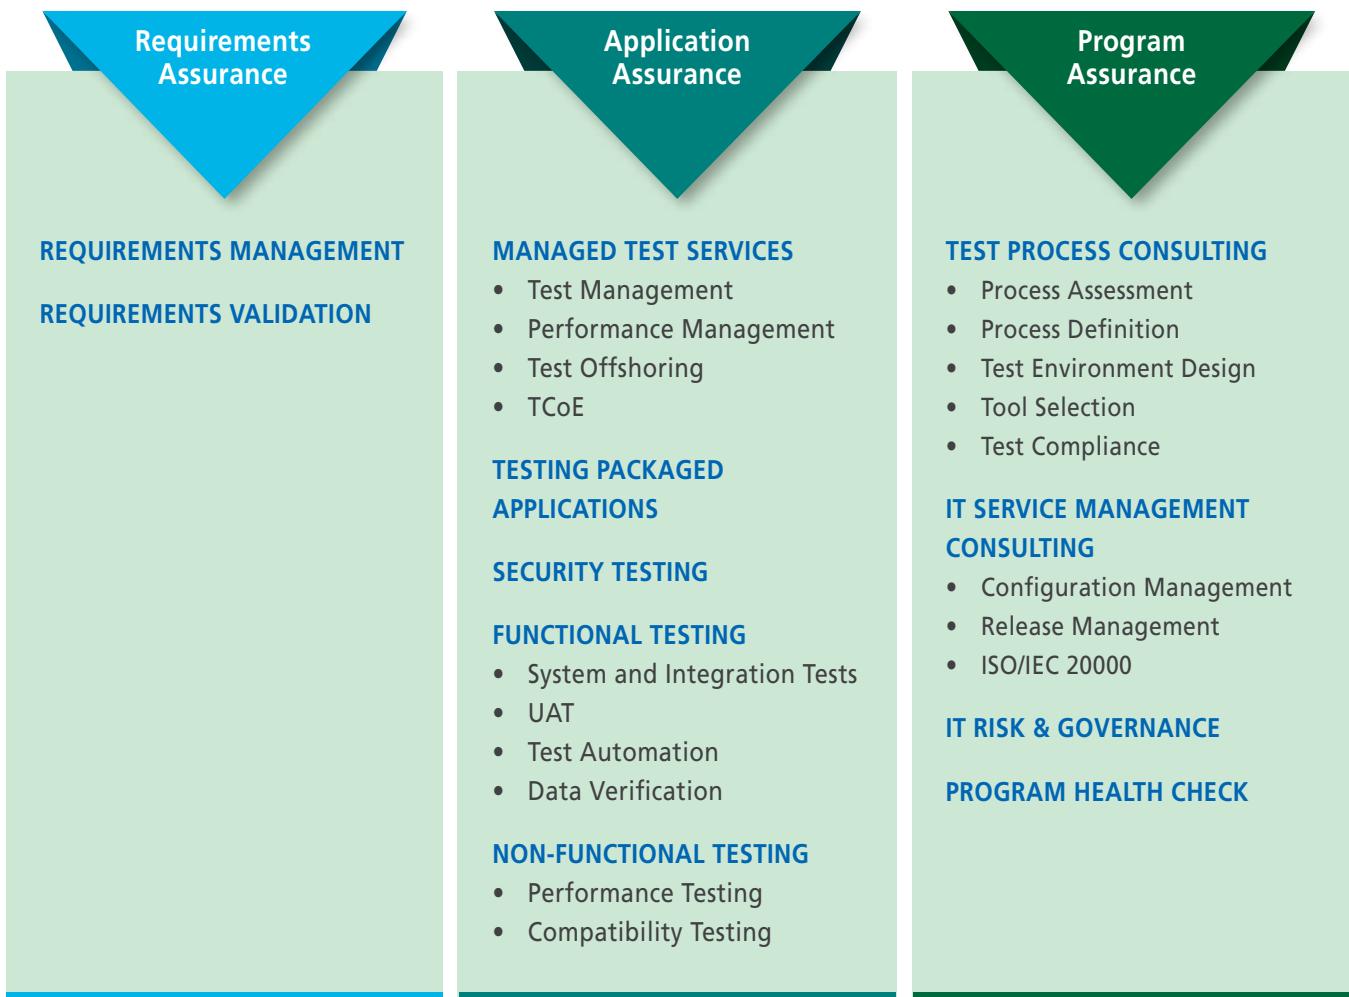

Maveric's assurance-only business model brings diverse domain and IP-led competencies under one umbrella and provides IT Lifecycle Assurance to clients in Europe, Middle East and Asia-Pacific. We build quality into processes and programs, making their outcomes more predictable. We also significantly enhance functionality, usability and performance of

applications our clients deploy. We power technology-led business transformation programs for leading corporates in the Banking, Insurance and Telecom verticals through our leading-edge domain expertise, innovative productivity accelerators and superior knowledge of industry-standard solutions. Apart from end to end testing and assurance services we

also offer a set of customised vertical-specific solutions and platforms to our clients. With our background of bringing innovative solutions to solve client problems, Maveric has developed a first-of-its-kind automated specification generating platform called AssureHawk™.

# Maveric's Assurance Services

## Sharp Focus On Select Verticals

### Banking & Finance

We bring vertical-specific productivity tools, test case repositories and test design accelerators to banking engagements for retail and wholesale banking, payment systems, treasury, cash management and trade finance. In addition, we bring product specialization in industry-standard solutions like Temenos T24, Finacle, Misys, SAP, Oracle and First Vision, to name a few.

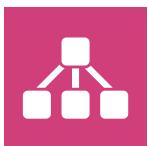

### Insurance

With deep insurance domain expertise, time-tested delivery models, exposure to leading applications and a worldwide footprint, we have been helping leading insurance companies achieve aggressive timelines and quality levels in their technology rollouts. Some products we have tested include PREMIA Life, INGENIUM, CSC LiFE Asia, CSC - Group Asia, TCS BaNCS, Elixir, Gennetica Australia and X-GEN.

### Telecom

With over 120 man years of experience in this domain, we have been providing solutions to telecom equipment manufacturers(TEMs) and Telcos that ensure quality and speed of the OSS/BSS solutions being deployed. We have experience working with BSCS, Oracle, Siebel, Amdocs and Wincash across the billing, charging, CRM, MNP, SDP, payments, fulfilment and service management landscape.

# What Gives Us The Edge

## Assurance-only

We are independent Assurance-only specialists. Our range of complementary services is aligned to the end-user segment and spans the entire IT implementation lifecycle of our clients. We start with requirements definition, management and validation, go on to defining robust processes and finally testing the application in the downstream.

## Domain-Specific

At Maveric, domain focus is not just about understanding a business at the vertical level but also about bringing deeper understanding of products, services, policies and regulations specific to the geographical regions where our clients operate in. We have built years of domain expertise and have created a dedicated pool of domain experts.

## Product-Centric

Over the last decade, we have built expertise around leading industry-standard solutions deployed by banks. We bring specific test case repositories, productivity tools and tested strategies to transformation programs involving these leading packaged applications.

## Innovation-Driven

Innovation drives everything we do at Maveric. We have introduced products, test design accelerators, test governance processes, test automation frameworks, and other solutions that offer ample evidence of how we bring a fresh perspective to common challenges our clients face in application and process quality.
